

# NO FIRE AUTOMATIC POWDER FIRE EXTINGUISHERS

These automatic powder fire extinguishers are designed for installation in larger areas where an increased discharge range is required. When the temperature reaches 68°C the extinguisher unit automatically discharges, releasing the powder agent and smothering the fire. The units are ideal for applications such as engine compartments, engine rooms and storage areas.

## Space volume suitable for:

6kg - 9.0 square metres

10kg - 15.0 square metres

Extinguisher fixing bracket supplied with the unit

Stored pressure fire extinguisher

CE marked

Easy to read pressure gauge for easy maintenance
