# NO FIRE FIRE REATED DOOR

NOFIRE supplies steel doors that combine fire resistance with functionality without compromising any aspect of either. These steel doors types reduce the spread of fire and enable safe egress, in addition to offering the highest degree of compartmentalization. All of our doors are fitted in strong steel door frames which will increase the level of protection. Highly preferred in all types of buildings today, these doors offer safe and secure living and ease of movement. No other steel door manufacturers provide a service like NOFIRE.

As one of the largest door manufacturers in Istanbul/Turkey, we supply a superb selection of resistant doors that include features such as: panel fire, rated glass, internal fire, glazed fire, rated metal, minute rated and panel fire. Our fire rated doors will protect your property in the event of a commercial fire or exterior fire.

As the number one door manufacturers in Turkey, our selection of fire rated doors and fire proof doors are unmatched in the industry. We construct doors that comply with FAA flammability testing procedures.

Fire doors must be fitted in strong internal fire door frames to ensure complete protection. NoFire fire door and frame sets are unrivalled in the market as we are one of the top fire rated steel door manufacturers.

Our Technical Team can assist you with the best advice and planning.
